AUTEN PEONIES

FAMOUS FOR COLOR

PINK SOLANGE, An Auten Origination

EDWARD AUTEN, JR.

Princeville, Illinois

THE AUTEN ORIGINATIONS

When you plant an Auten Origination you are to enjoy some of the results of 35 years of careful work in the development of new varieties. Peonies do not come true from seed, and the 240 Auten Peonies were selected from many thousands grown from seed. It takes from nine to fifteen years to make a new variety ready for sale, and for one so chosen, several hundred mature plants, five years or more of age, may have been grown and discarded.

The Auten Peonies include many of the world's finest. Among them we offer you

Unfading reds in doubles, singles and Japanese type
Singles and Japanese unsurpassed

Rose fragrant doubles

Sure blooming late doubles for the warmer parts of
the Peony belt

Plants with strong stems and vigorous growth

Glorious new early blooming Hybrids

Peonies are not only the finest of all hardy perennial plants, they are also just about the easiest to grow. Planted in good soil, well drained, with full sun if possible, they last many years, and require a minimum of care.

We send quality roots, the standard 3 to 5 eye division, which is the best size to plant. Full planting and cultural directions are included in each shipment. Roots are fresh dug to order, and so arrive full of life. They are grown here in rich corn belt soil, and every precaution is taken to grow healthy, vigorous stock.

Since a Peony is so long lived, it pays to get only the finest kinds. The added satisfaction and enjoyment every year in having the very best makes first cost not an expense, but an investment. Our quality standards are the very highest, our prices most reasonable.

Write us if you wish special advice on choice of varieties or on cultural problems.

NOTE. People living as far south as St. Louis should choose mostly early doubles, singles and Japanese type.

1952 INTRODUCTIONS, Auten Originations

- Early Scout** A true hybrid, a cross between Richard Carvel and a single red *Tenuifolia*, probably *T. Hybrida*. This is a very dark red single, very early, blooming before any of the early *Officinalis* Hybrids, and usually with *Anomola Smouthii* and *Tenuifolia*. Makes a good sized plant, with coarsely cut foliage. Bloom is darker red than *Anomola Smouthii* and lasts longer. Also is not subject to frost damage to the buds as is *Anomola*. 7.00
- Drummer Boy** A very brilliant dark red bomb on a stiff stemmed dwarf plant, the trim foliage, the beautifully formed blooms carried boldly erect, all combine to make an especially effective display. As the bloom begins to age it may fade in some climates, but no worse than many other named kinds, and it is so very fine until that time that I am offering it anyway..... 10.00
- Kathryn Curran** A large late pure white double of especial refinement and charm. Rose fragrant. A mass of trim foliage starting at the ground level, the blooms carried gracefully above it.... 10.00
- Northland** A very early blush white double, high built bloom, on tall stiff stems, ideal for cutting. Rose fragrant. I believe this is a chance seedling of the tall black red semi-double Adolph Rousseau. At any rate, it is very distinct from all other white doubles, and very much worth while. 10.00

**Queen of the Dawn. Pink single
A Hybrid. Auten Origination**

OFFICINALIS HYBRIDS, Auten Originations

This new race of hybrid Peonies starts blooming about ten days before the regular Peony season. They are of surpassing beauty, giving us reds more brilliant than we have ever had, and new shades in coral, cherry, salmon, and orange; reds free from any purple cast. They were obtained by crossing the common species, Albiflora, on the Officinalis species, which is much earlier. The result is a longer Peony season, a vast improvement in reds, and beautiful variations in form of bloom. Until one has seen them, he can have no comprehension of their beauty. They make an outstanding addition to any garden. We suggest that for first order you select from **Chocolate Soldier, John Harvard, Rose Marie and Veritas.**

- Chief Justice** Very rich deep red, color exceptionally fine. Good size, with stiff stems. One of the latest Hybrids, blooming with the first of the regular season. Double..... **7.00**

JAPANESE TYPE PEONIES

So called because the Japanese people prefer them to all other types of bloom, and were the first to develop many new kinds. This type is the first advance toward the double type, with narrow center petals, usually edged with yellow. They furnish color contrasts in the same flower obtained in no other type, and are especially valuable for cutting. In the anemone type, the narrow center petals have no contrasting yellow markings, though some, like **Nippon Gold**, have all yellow centers.

The AUTEN ORIGINATIONS, Japanese Type

WHITE JAPANESE, Auten Originations

Undoubtedly the finest white Jap that ever came from Japan is the variety Isani-Gidui. It has white guard petals of wonderful form and substance, and a center of yellow petaloids. But the stem is not the best and the plant also lacks vigor. The Auten white Japs, most of them seedlings of Isani-Gidui, are the same type of bloom, some are larger, most of them have deeper yellow centers than Isani-Gidui, and all are on vigorous plants with good stems. You need look no further for top quality white Japs.

Roberta	Very large, and tall, a refined bloom, plant less formal than the others.....	1.50

THE AUTEN SINGLE PEONIES

Single Peonies, with their fine contrast between the petals and the mass of yellow stamens should be more and more appreciated. We have obtained kinds which retain their charm till the end, which do not flop their petals badly, and which are borne on strong plants with good stems. Discordant colored seed pods are not tolerated, they must be green or same color as the petals. Extreme size is not desirable. Choose from the following with confidence.

- FROM NEW YORK. *I have so enjoyed the Peonies which have come from you.*
- FROM ILLINOIS. *We wish to thank you for the most enjoyable visit we had with you yesterday. We certainly saw with our own eyes that "Auten Peonies are different."*
- FROM UTAH. *Topeka (a hybrid) and Prudence were especially outstanding this year. Nippon Beauty, Nippon Gold and Nippon Brilliant won blue ribbons in the local spring flower show.*
- FROM WISCONSIN. *An 8 by 7½ inch bloom of Yukon faces me as I write this; there were many blooms, and all lovely.*
- FROM MINNESOTA. *(A nurseryman) We also liked your Sky Pilot very much.*
- FROM OHIO. *(A nurseryman with nearly 1,000 kinds) None better for me here than Mary Auten.*

PLANTING DIRECTIONS

IMPORTANT—Open your package of roots immediately when they arrive. Plant as soon as possible but if you have to wait a few days, either keep moist in open box in cool cellar, or better yet, bury in garden.

Plant Peonies in good, well drained soil, in full sun if possible, and away from trees, buildings, etc. Do not plant where a peony has been before, unless all old soil is taken out and replaced with fresh. Plant 3 to 4 feet apart; set so that the eyes point upward and are 2 to 3 inches below the top of ground (very important). Give each root 2 quarts of water when planted, and then make a 6 inch mound of dirt above ground level to prevent heaving, scrape mound away late next spring.

In northern states, a mulch the first winter is advisable.

Fall is the natural planting time for Peonies. (After September 1st and before November 1st if possible).
